

HOW TO BE SUCCESSFUL

Communication and confidence

- Pay attention when others speak and show you're interested.
- Say what you mean in simple words. Think about what you want to say beforehand.
- Smile, make eye contact, and use gestures.
- Use stories to make your points interesting.
- Try to speak in English for 3 to 4 hours daily.
- Replace negative thoughts with positive ones.
- Achieve small goals and celebrate your success.
- Stand tall and make eye contact.
- Being prepared can help you feel more confident.
- Surround yourself with encouraging people.

Question yourself?

- First, we have to question to yourself only
- Why am I joining this institute?
- What do I hope to achieve?
- Why I choose this course only
- What about my future goals think yourself, you will find out answers easily

Coding is a skill

- Write code regularly to improve.
- Coding is not just about memorizing and byhearting. It is about understanding only
- Work on small projects to apply what you learn.
- Finding and fixing errors is a big part of coding.
- Enjoy the coding while you learn
- Join coding groups for support.

Research and creativity

- Research is about finding new information or understanding something better.
- Gather information from reliable sources like you tube, google etc.,
- Analyze the information.
- We need to be improving your implementation ideas.
- Like any skill, creativity improves with practice.

Reading

- Reading requires focus, which can help improve your concentration over time.
- Keeps your brain active and engaged.
- Find a quiet and comfortable place to read.
- Set reading goals,

Online presence

GitHub and LinkedIn

- Every student should be more engaged on platforms such as LinkedIn and GitHub.
- We must communicate our daily activities on these two platforms.
- This indicates your level of interest in the selector. Organizations are increasingly active on both
- platforms.
- You should believe the same way every day, with the same attitude toward people, and it will work.
- You must spend some time daily on linkedin for job updates
- Save your projects on github.

Common mistakes to avoid

- Do not compare with others
- Always active in the classes
- Spend time with your self then you can know your mistakes.
- Don't waste time on unnecessary things.
- Be regular in attending classes. missing classes leads to confusion

Thanks, and regards
